COMPANY PROFILE

Technology. Security. Business outcomes.

Invitty Cognitive Solutions | Chennai | Established in 2013

Choose well. Deploy with confidence.

We bring technology procurement, implementation and security services together. From a single renewal to a wider infrastructure or AI project, Invitty helps you define the right scope and select suitable solutions.

WHAT WE CAN HELP YOU WITH

Protect	Firewalls, endpoint security, SASE, identity and data protection.	02
Enable	Microsoft 365, Google Workspace, Adobe, Autodesk and business applications.	03
Build	Servers, networks, storage, backup and workplace devices.	04
Assure	VAPT, compliance readiness, GRC and security assessments.	05
Advance	AI strategy, copilots, agentic workflows, analytics and AI infrastructure.	06

A practical engagement

Discover the need. Compare options. Agree the proposal. Deploy, validate and hand over.

Talk to us: +91 98405 87602

01 / CYBERSECURITY

Protect users, data and applications.

Select controls around your risks, working patterns and existing environment.

Firewalls & network security

Firewall sizing, secure connectivity, segmentation, migration and subscription planning.

Fortinet
Palo Alto Networks
Sophos
Check Point

SASE, SSE & zero trust

Secure web access, cloud application controls, private access and data protection.

Netskope
Zscaler
Skyhigh Security
Forcepoint

Endpoint protection & response

Endpoint security, EDR/XDR and managed-service options with agreed monitoring and response responsibilities.

CrowdStrike
Trend Micro
Trellix
SentinelOne

Exposure & security operations

Vulnerability and exposure management, detection platforms, threat visibility and investigation tools.

Tenable
NetWitness
ExtraHop
Cyware

Identity, email & data security

Access management, privileged accounts, authentication, email protection and information controls.

CyberArk
BeyondTrust
Barracuda
Entrust

Discuss your security priorities >

02 / WORKPLACE & SOFTWARE

Equip teams to do their best work.

New licences, renewals, migration and implementation scope in one discussion.

Microsoft 365 & Google Workspace

Business email, productivity and collaboration plans, with licensing, administration and security requirements.

Microsoft

Google Workspace

Email migration & collaboration

Scope mailbox data, cutover and user communication; explore meetings, voice and workplace collaboration.

Zoom

Avaya

Adobe & Autodesk

Creative Cloud, Acrobat, AutoCAD, Revit and industry collections selected around users and disciplines.

Adobe

Autodesk

Business applications

CRM, ERP, service management and work management for business teams and operational workflows.

Zoho

Microsoft Dynamics 365

Freshworks

Monday.com

Cloud, data & platform software

Cloud planning, data and analytics, virtual desktops, Linux, Kubernetes and remote access software.

Snowflake

Citrix

Canonical

SUSE

Request a licensing or migration proposal >

03 / INFRASTRUCTURE

Build a dependable foundation.

Size infrastructure around applications, users, availability and growth.

Servers & AI compute

Workload-based CPU, memory, storage and accelerator configurations, with support and deployment planning.

HPE
Dell Technologies
Lenovo

Switching, Wi-Fi & visibility

Port capacity, PoE, uplinks, wireless coverage and network visibility for offices and branches.

Cisco
Aruba (HPE)
Juniper Networks
Arista

Storage, backup & recovery

Define usable capacity, protected workloads, recovery objectives and restore testing requirements.

Veeam
Synology
QNAP
Acronis

Business devices & management

Laptops, desktops, workstations and device-management options matched to users and operating needs.

HP & HPE
Microsoft Surface
FileWave
halofort UEMX

HPE server models

DL145 Gen11 | EL8000s | ML350 Gen12 | DL345 Gen12
DL365 Gen11 | DL380 Gen12 | DL385 Gen11 | DL380a Gen12

Configurations, GPU options and availability are confirmed against the agreed bill of materials.

Discuss your infrastructure requirements >

04 / SECURITY & COMPLIANCE SERVICES

Find gaps. Define the next action.

Practical assessment and readiness support with clearly scoped deliverables.

VAPT	**Security testing across agreed applications, APIs and infrastructure; prioritised findings and remediation guidance.**
ISO 27001	**ISMS readiness, risk assessment, policies and implementation support for the agreed certification scope.**
SOC 2	**Readiness, control mapping and evidence preparation for an independent assurance examination.**
DPDPA readiness	**Review data handling, governance and implementation priorities for the organisation.**
GRC & compliance	**Bring risk registers, policy requirements and compliance activities into a structured programme.**
HIPAA readiness	**Assess relevant safeguards and organise remediation priorities and documentation.**
PCI DSS readiness	**Review the payment-data environment and prepare scope, controls and evidence.**
Container security	**Assess image, dependency and workload security within the software delivery environment.**
AI & LLM security	**Review AI application risks, access, data exposure and controls for the agreed use case.**

Consulting and readiness support do not constitute certification or an independent audit opinion. Assessor responsibilities are agreed separately.

Scope your assessment >

05 / AI SERVICES

Make AI useful in everyday operations.

Start with a business problem, suitable data and measurable acceptance criteria.

AI strategy & consulting	Prioritise use cases and establish a roadmap, feasibility review and governance approach.
Generative AI & copilots	Explore knowledge assistants and document workflows grounded in your business information.
Agentic AI	Design task-oriented workflows with tools, permissions and human review at important steps.
Decision intelligence	Bring reporting, natural-language questions and business analysis closer to decision-makers.
Data & process intelligence	Assess data readiness and process opportunities before automating the workflow.
AI in a Box	Plan an on-premises AI environment around model, security and infrastructure requirements.
AI security	Review access, sensitive information, model behaviour and application risk.
OT security	Assess security needs for operational and industrial environments.
Fraud detection	Explore detection workflows using relevant transaction signals and investigation processes.
Video analytics	Evaluate camera-based use cases with clear operational, privacy and deployment requirements.

Explore a focused AI use case >

06 / BRAND DIRECTORY

Your technology options. 1 / 3

Click a brand to explore its offering on invitty.com.

Acronis
Backup, DR & integrated cyber protection.

Adobe
Creative Cloud & Acrobat.

AnyDesk
Business remote desktop.

Archer
Integrated risk management & GRC platform.

Arista
Cloud & data-center switching, CloudVision.

Aruba (HPE)
Instant On & enterprise Wi-Fi, CX switches.

Asus
ExpertBook business, ROG & TUF gaming, ProArt creator.

Autodesk
AutoCAD, Revit & Collections.

Avaya
Enterprise comms & contact center.

Barracuda
Email protection, backup & WAF.

BeyondTrust
Privileged access management (PAM) & identity security.

Canonical
Ubuntu Pro, Linux, Kubernetes & support.

Chainguard
Zero-CVE container images.

Check Point
Quantum Spark & Force, Harmony Email.

Checkmarx
Application security - SAST, SCA, DAST, API.

Cisco
Secure Firewall, Meraki, Catalyst.

Citrix
Virtual apps & desktops (VDI/DaaS), NetScaler.

Claroty
OT, ICS & IoT security for industrial and healthcare.

CrowdStrike
Falcon EDR/XDR & Complete MDR.

CyberArk
Identity security & privileged access management.

Cyfirma
External threat & attack-surface intelligence.

Cyware
Threat intelligence, SOAR & cyber fusion.

Dell Technologies
PowerEdge servers, Latitude, OptiPlex.

Dynabook
Portégé & Tecra business laptops (ex-Toshiba).

Entrust
PKI, certificates, HSMs & identity.

ExtraHop
Network detection & response (NDR).

FileWave
Cross-platform UEM / MDM device management.

Brand names and logos belong to their respective owners. Scope and availability are confirmed in the proposal.

06 / BRAND DIRECTORY

Your technology options. 2 / 3

Click a brand to explore its offering on invitty.com.

Forcepoint
Data-first SASE, DLP & NGFW.

Forescout
Device visibility, NAC & OT security.

Fortinet
FortiGate firewalls, FortiAP, FortiSwitch.

Freshworks
Freshdesk, Freshservice, Freshsales.

Gigamon
Deep observability, TAPs & packet brokers.

Google Workspace
Plans with Gemini AI.

halofort UEMX
Indian-built UEMX - MDM, endpoint, identity & Zero Trust.

HP & HPE
EliteBook, ProBook & ProLiant.

HPE
ProLiant servers, edge and AI infrastructure.

Juniper Networks
SRX firewalls, EX switches, Mist AI.

Kaspersky
Next EDR tiers.

Lenovo
ThinkPad, ThinkBook & ThinkSystem.

Mandiant
Threat intel, IR, MDR & validation.

Menlo Security
Browser isolation, SWG & ZTNA.

Microsoft
M365 with Copilot, Server, SQL.

Microsoft Dynamics 365
ERP & CRM: Sales, Finance, Business Central.

Microsoft Surface
Surface Laptop, Pro & Studio for business.

Monday.com
Work OS: work management, CRM, dev & service.

MSI
Raider, Stealth & Katana gaming, Creator PCs & desktops.

Netgear
Business switches & Insight Wi-Fi.

NetScout
Network performance visibility & Arbor DDoS.

Netskope
SASE, CASB, DLP & AI governance.

NetWitness
SIEM, NDR, EDR & XDR platform.

Niagara Networks
Network TAPs, packet brokers & bypass.

OneLogin
Cloud IAM - SSO, MFA & provisioning.

OpenText
Content management & cybersecurity (Fortify, ArcSight).

Outseer
Payment authentication & fraud prevention.

Brand names and logos belong to their respective owners. Scope and availability are confirmed in the proposal.

06 / BRAND DIRECTORY

Your technology options. 3 / 3

Click a brand to explore its offering on invitty.com.

Palo Alto Networks
PA-series ML-powered NGFW.

QNAP
NAS storage, ZFS & rackmount, backup target.

RSA SecurID
MFA, access management & identity governance.

Sectrio
OT, IoT & ICS cybersecurity.

SecurityScorecard
Security ratings & third-party risk.

SentinelOne
Singularity AI EDR/XDR & MDR.

Seqrite
India's own enterprise endpoint security.

Skyhigh Security
SSE - CASB, SWG, ZTNA & cloud DLP.

Snowflake
AI Data Cloud, migration & analytics.

SonicWall
Gen-8 TZ & NSa firewalls.

Sophos
XGS firewalls, Intercept X, MDR.

SUSE
Enterprise Linux, Rancher Kubernetes & edge.

Synology
DiskStation & RackStation NAS.

Tenable
Exposure & vulnerability management (Nessus).

TP-Link Omada
Budget SDN: APs, switches, gateways.

Trellix
ENS, EDR & email security.

Trend Micro
Vision One, Apex One, Worry-Free.

Utimaco
HSMs, key management & data protection.

Veeam
Data Platform & M365 backup.

Veritas
NetBackup & Backup Exec.

Versa Networks
Unified SASE - SD-WAN & SSE.

Zoho
One, CRM, Books & Workplace.

Zoom
Meetings, Zoom Phone & contact center.

Zscaler
ZIA, ZPA & Zero Trust Exchange.

Zyxel
USG FLEX firewalls, Nebula networking.

Brand names and logos belong to their respective owners. Scope and availability are confirmed in the proposal.

07 / YOUR NEXT STEP

Tell us what you need to achieve.

New purchase. Renewal. Migration. Security assessment. AI project.

A clear scope makes a stronger proposal.

01 Understand	Share your environment, priorities, quantities and target date.
02 Recommend	Compare suitable products and agree the configuration or service scope.
03 Deliver	Plan deployment, acceptance checks and handover responsibilities.
04 Support	Confirm coverage, ownership, documentation and renewal requirements.
